About Me

I'm a passionate quality assurance technician with years of experience in software development, automation and software testing. Skilled in Python, JavaScript, C# and Java. Using my skills learned from software development and my passion with games, I create innovative solutions by blending programming and gamification.

Work Experience

Testronic Labs — Quality Assurance Technician   **Jan 2024 - Present**

Executed different testing methods to ensure the quality of the software.

Filed defects using different tools such as Jira and proprietary software and escalating to the leads arising issues.

Supported test case writing for the software functionality.

Executed live monitoring for checking of live bugs and escaped defects in Live builds of software.

Avasia Information Systems Inc. — Junior Software Developer   **Mar 2023 – Jan 2024**

Developed Mobile Apps using Ionic, Android Studio and Xcode

Published and Managed mobile apps in Google Play and App Store using Google Developer Console and App Store Connect

REST API Testing using Postman and documentation using Swagger

Automation Testing using Selenium Python

Developed "Krono Cloqin" a timekeeping application for company and commercial use.

Revamped existing helpdesk ticketing system "Sissa" for managing and deployment of tech supports.

Managed AWS EC2 servers and S3 buckets.
